## What I DO:

- Promote environmental justice.
- Write, speak and translate environmental information in English and Spanish.
- Build community outreach and empower residents in Tracy and San Joaquin County, as well as Livermore.
- Help the community to be better involved in environmental decision-making regarding the Livermore National Laboratory's Site 300 nuclear weapons experimental facility near Tracy, CA.
- Focus on Spanish-speakers and youth in Tracy and other communities.
- Maintain relationships with governmental and non-governmental organizations to increase everyone's understanding of the cleanup of toxic pollutants at the Main Site and Site 300.
- Work with leaders to increase their understanding of the Superfund cleanup of toxic and radioactive pollutants and other programs at Livermore Lab.

I'm looking forward working with you and the community. Please, do not hesitate to reach out to me. I am happy to help in every way possible! If you know of any Spanish-speaking residents, please send me their contact information or share mine at [raiza@trivalleycare.org](mailto:raiza@trivalleycare.org).
