WHAT'S HAPPENING AT LLNL

Founded in 1952 to speed the development of new "generations" of nuclear weapons, the Livermore Lab is one of two locations where all U.S. nuclear weapons are designed. Livermore Lab is currently spending billions to develop a new warhead for U.S. Intercontinental Ballistic Missiles, another new warhead for a surprise nuclear attack to be launched by airplanes, and a third new warhead for small submarines that do not presently carry any nuclear weapons. This is the place to be to stop nuclear weapons and demand their total elimination!

SUPPORT THE HIBAKUSHA

We join the survivors' cry of "Never Again!" as we celebrate Nihon Hidankyo, the association of Japanese A-bomb survivors and recipient of the 2024 Nobel Peace Prize. And, we recommit ourselves to nuclear abolition on the occasion of this 80th anniversary, carrying forward the work – and ensuring its visibility – as the last survivors pass on.

LIVERMORE CONVERSION PROJECT NONVIOLENCE GUIDELINES

We agree to abide by the following guidelines in all of the August 6 actions:

- We will be open and respectful to everyone we meet;
- We will not use verbal or physical violence;
- We will not destroy property;
- We will not bring drugs or alcohol, except for medicinal purposes;
- We will not bring weapons;
- If arrested, we will not resist;
- We will not run, which can cause panic;

If legal consequences follow our actions, we will treat all those we encounter in the process with openness and respect.
