via email at PitPEIS@nnsa.doe.gov
until July 16.***

A federal judge in South Carolina found that the government failed to adequately assess the impacts of their plutonium "pit" nuclear bomb core expansion plan. This requires a "hard look" analysis of the plan's potential nation-wide human health and environmental impacts in the form of a Programmatic Environmental impact Statement (PEIS). We urge you to participate in this critical opportunity for public scrutiny of and formal comment on this dangerous plan!
